

### PLUG & PLAY

- Easy and flexible placement in- & outdoors
- No extra training needed
- Stand-alone: no base station or repeater
- Easy to move between customers

**Just set it and it's ready to monitor your catches!**

### CATCH OR NO CATCH?

- Sensor reports on 3 states (ready / catch / no catch)
- Immediate alarm notification via the TrapSensor app and/or e-mail

**Prioritize and schedule customer visits upon need!**

### DATA-DRIVEN

- Real time reports about catches
- Transparency for your customers
- Available data to analyze efficiency

**Adjust your rodent control management based on data!**

## IoT Snap Traps for green and efficient pest control

Save time & money – only drive out and manually inspect traps when there is a catch

**Call +45 2195 4858 to add TrapSensor to your green rodent control portfolio!**

# Remote Monitoring Rodent Trap System

RAT

MOUSE

## Efficient Traps

- Rat and Mouse snap traps
- Effective kill bar & strong springs ensure a high kill rate
- Teeth to keep a catch in place
- Accessory: patented “Teeth Clip” to clip onto the metal kill bar
- Fits into all standard bait stations
- Sensor reports on 3 states (ready / no catch / catch)
- Works anywhere without a base station (NB-IoT + 2G fallback option)
- Battery lifetime 2-3 years

## User-friendly System

- Immediate notification when the trap shuts
- Summarized, scheduled status reports for all traps
- Alerts when action is needed (low battery or no connection)
- TrapSensor mobile app (Android / iOS)
- Look up the status of traps anytime (web or mobile app)
- Scalable: manage any number of traps, technicians and customers
