2) 5V Power Supply
3) Battery drawer
4) Aegis key
5) Bait drawer
6) 4 LR14 batteries
7) 15 bags
8) 2 packets of activated charcoal
9) Removable ladder

User Manual

Dimensions : 25 x 25 x 25 cm
Power supplied to the trap by LR14 batteries or by a 5V transformer.

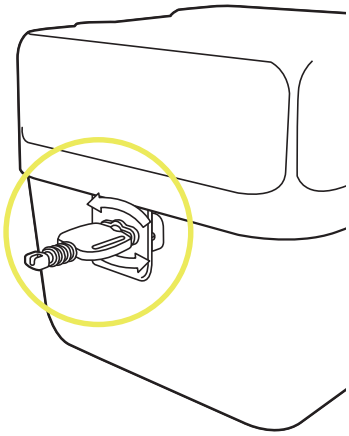

This device is equipped with seals, making it completely hermetic to limit unwanted odors as much as possible.

Handle the lid with care.

A - Steps to follow for installing the trap

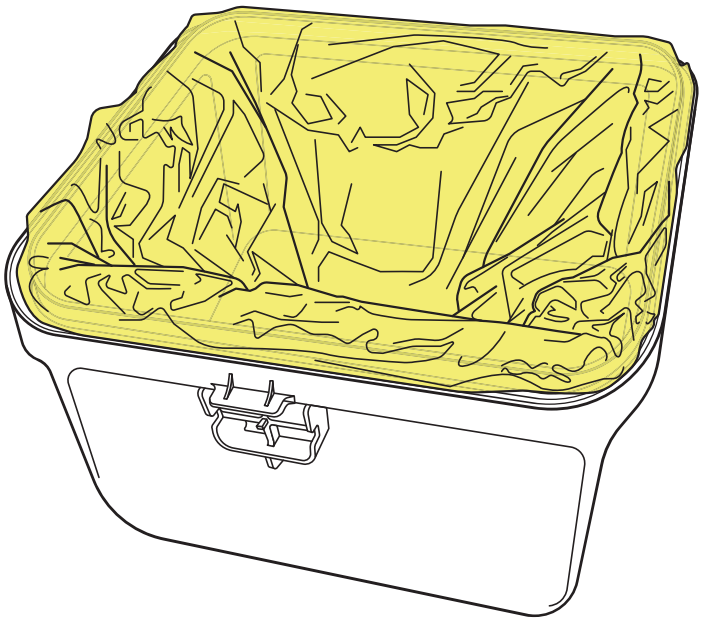

1. Unlock the lid and open the trap.

Secure opening with the universal Aegis key.

2. Place a dose of activated charcoal (provided) into the plastic bag intended to collect mice.

3. Place the bag in the trap's basin and adjust the bag's edges in the channel around the basin.

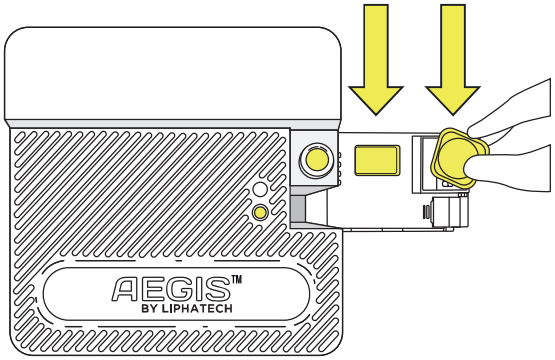

4. Replace the lid on the basin and lock it.

5. Remove the bait drawer.

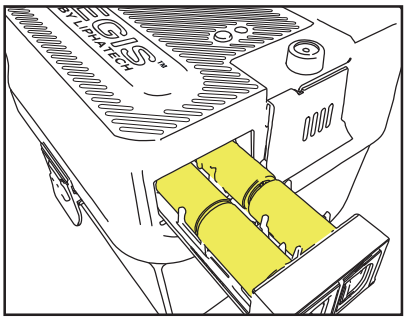

• Open a NOTOX PAT' and make crumbs stick to the bait drawer grid and in the designated compartments in the middle of the platform. CAUTION: do not allow the bait to protrude outside the compartments to avoid any risk of blockage.
• Place 3 NOTOX PAT' (including one open) in the bait drawer.
• Replace the bait drawer in its compartment.

Tip

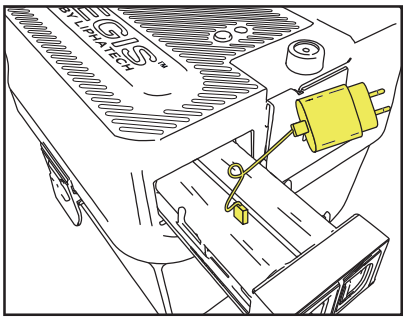

In case of strong food competition, add to the NOTOX PAT' what mice are accustomed to consuming on the site (flour, animal feed, biscuits...).

6. Depending on the chosen power mode, insert 4 LR14 batteries or plug in the power cable.

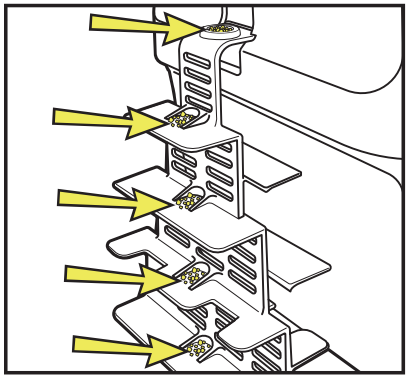

LR14 batteries

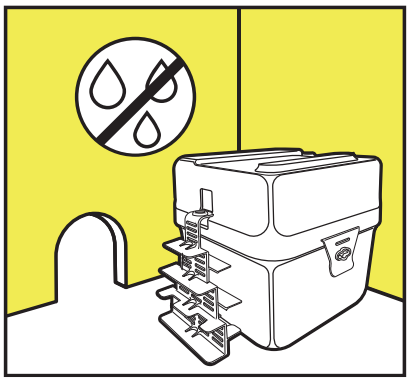

5V Power Supply

7. Install the access ladder to the trap and deposit NOTOX PAT' crumbs in all the compartments provided at different levels of the ladder. You can also place what mice consume on the site.

8. Position the trap on a mouse path, along a wall, and place the ladder against the wall. The trap must be installed on a horizontal surface (ensure the level bubble is centered).

9. Do not place the trap in a location that is too humid or exposed to the weather. For outdoor use, ensure it is mandatorily sheltered.

10. Switch on the trap by pressing the button (short press): the LED lights up white, and the trap initializes.

The CLASH is ready to operate.

B - Maintenance Recommendations

⚠ Handle the lid with care.

⚠ Do not use liquid in the tunnel or in the battery drawer.

⚠ Do not immerse the lid.

• Regularly clean the bait drawer with a dry cloth or brush without using cleaning products (they can have a repellent effect on mice).
• Don't spray water into the trap.
• Ensure to remove the batteries when storing the trap.

C - Trap States - LED Color Meaning

Short press on the button.

LED color	Meaning
White	Trap turning on – It was off before pressing the button
	Trap operational – 0 mouse caught
Green	Trap operational – Between 1 and 5 mice caught
Orange	Trap operational – Between 6 and 15 mice caught
Red	Trap operational – Between 16 and 24 mice caught
Purple	A fault is detected

If the LED is purple or does not light up :

• Check that the tunnel is not blocked.
• Open the battery drawer, put it back in place, and switch on the trap by pressing the button.
• If the trap still does not turn on, remove the batteries and power the trap from the mains using the power cord.
• If the LED does not light up or remains purple after these operations, contact LIPHATECH customer service.

If the LED stays lit in red, the trap has caught 25 mice. Turn off the trap by pressing the button (long press) and replace the bag. Remember to put a dose of activated charcoal in the new bag. Switch on the trap again.

D - Warranty

- Equipment intended exclusively for hygiene and Pest Control professionals.
- In case of handling by a user other than a hygiene or Pest Control professional, LIPHATECH's responsibility cannot be engaged in any case.
- Warranty for a duration of 1 year from the billing date.

E - The warranty

The warranty will be activated if and only if the hygiene or Pest Control professional respects the usage conditions mentioned in this user manual. It must be carefully read during installation and respected throughout the use of the trap. The guarantee does not apply to a trap that has been dismantled.

F - Warnings

- DO NOT dismantle the trap
- DO NOT allow children or persons with reduced physical, sensory, or mental capacities, or lacking experience or knowledge, to use or handle the trap.
- USE ONLY non-rechargeable alcaline LR14 type batteries in good condition, or use the supplied 5V transformer.
- ALWAYS store the trap at temperatures between 10°C and 25°C to preserve the lifespan of the supplied batteries.
- DO NOT USE the trap at temperatures below -18°C or above +40°C.
- ALWAYS dispose of batteries in compliance with the regulations in force.
- DO NOT stack more than 15kg of load above the trap.
- DO NOT play with the trap.
- AVOID handling the trap in the presence of children.
- DO NOT immerse the trap in liquid.
- DO NOT use a damaged trap.
- DO NOT adapt/modify the trap.
- WEAR appropriate safety equipment during the preparation and use of the trap.
- DO NOT move or handle the trap when it is in operation.
- REMOVE the batteries or unplug the trap before any cleaning or handling.
- DO NOT insert anything into the trap's tunnel.
- PROTECT from sunlight. Store in a well-ventilated place and do not expose directly to rain or water spray.

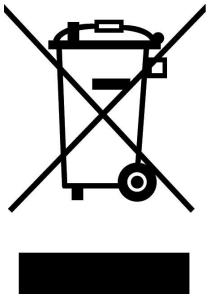

H - Customer Service and Trap Return Conditions

Customer service is available on the platform https://support.desangosse.com

⚠ If you need to return the trap, be sure to use the original box for shipping.

I - Other

Disposal of the device: The European Directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE) requires that used household appliances must not be thrown away with normal municipal waste. Used devices must be collected separately to optimize the recovery and recycling rate of the materials composing them and reduce the impact on human health and the environment.

We certify and declare under our sole responsibility that the designated equipment complies with the Essential Requirements of the following European Directives:

• DIRECTIVE 2014/53/EU OF THE EUROPEAN PARLIAMENT AND COUNCIL of February 26, 2014, relating to the harmonization of the laws of the Member States regarding the availability of equipment on the market.

• DIRECTIVE 2011/65/EU OF THE EUROPEAN PARLIAMENT AND COUNCIL of June 8, 2011, on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS Directive)

• DIRECTIVE 2012/19/EU OF THE EUROPEAN PARLIAMENT AND COUNCIL of July 4, 2012, on waste electrical and electronic equipment (WEEE Directive)

Protection test against infiltration Protection Index IP IEC 60529: 24
